CLASSVR®

IMPROVING ROAD SAFETY WITH VIRTUAL REALITY EXPERIENCES

ClassVR is the ideal solution for Emergency Services training for its ease of use and impact when delivering Road Safety Awareness programmes to young people. Our Virtual Reality technology can provide realistic and hard-hitting experiences of serious road accidents, and the consequences of dangerous driving.

"Discovering ClassVR has let us convey our road safety messages to a far greater number of people in a more efficient manner than we first thought possible. It truly is an excellent solution for showing VR in a classroom or at events and I look forward to seeing how the technology (and our use of it) develops."

Jennifer Stark
Area Communications Manager, Police Scotland

CLASSVR®

Everything you need to implement VR into your training programmes.

Standalone Headset - No Mobile Device Needed

ClassVR's headset is a standalone device, delivering a fully immersive VR experience under the trainer's control. Unlike other VR headsets, ClassVR does not require any additional devices, such as mobile phones. Everything is fully integrated into the device, making it easy to use and highly reliable.
Simple Control and Management

At the heart of ClassVR is our user-friendly portal, providing all the necessary content and tools to successfully deliver immersive and engaging virtual reality experiences in any environment. Whether in a training room, school, office building or at an exhibition, ClassVR will give you total control.

ClassVR's online portal makes it very easy to drag and drop your VR content into your custom playlist. With a click of a button, experiences can be sent straight to the headsets, enabling you to simultaneously control VR experiences in real-time from one device. Videos are sequenced so that every student will see the video at the same point, allowing trainers to comment as the video plays.

Uploading Your Own Content

The ClassVR system provides maximum flexibility to create, upload and use your own content when using virtual reality for your training needs.

It is very simple to upload photos and videos from a 360 camera to the ClassVR portal, and then send straight to the headsets with just a simple click. With 100Gb of storage included, it allows for multiple images and videos to be uploaded and saved.

CPD, Training, Implementation & Support

At ClassVR, we provide full set-up, training and support to make sure you have everything you need to get up to speed quickly and confidently, helping you to deliver your road safety training schemes with ease.

We also offer comprehensive online courses which have been designed to help you get the most from your new investment. The courses consist of bite-sized lectures with short videos and quizzes, which allow you to learn at your own convenience.
